# RECURVE SOFTWARE

Powering Home Energy Professionals

Building on six years of frontline experience conducting energy audits and retrofits, Recurve has created an industry-specific software application designed to speed up the process of auditing homes, crunching the numbers, and generating reports and estimates – so you can focus on what really counts: identifying your customers' needs, designing smart solutions, and getting new business on the books.

Recurve Software will enable your team to:

- Close more sales with more efficient audits
- Stand out with professional reports and proposals
- Get out of the trenches and focus on growing your business

> "The holy grail in our industry has always been the ability to present the audit report at the conclusion of the audit. Recurve makes this possible. I'm seeing the results of this daily, as we turn more audits into retrofits on an accelerated basis."
>
> Greg Galanos, CEO of Energy360 Solutions

FEATURES & BENEFITS

How it Works

- Software as a service – no server to buy, install, or maintain; runs over the Internet.

- Deploys in the field on inexpensive computers, including low-cost netbooks and notebooks.

- Works online and offline, so auditors are always productive even when at job sites with no Internet connection.

- Clean, no-nonsense interface that's easy to learn, yet powerful enough to deliver consistent, professional results.

Streamlined Data Collection

- Streamlined data collection process, enables you to get the job done faster while maintaining accuracy and consistency.

- Seamless back-end database supports different climate zones, residential building types, heating systems, and construction characteristics.

- Monitors progress and checks for errors as you go. Assures consistent data, and accurate reporting, simulation, and project specs.

- Integrated help buttons save you time on-site by answering questions about complicated inputs.
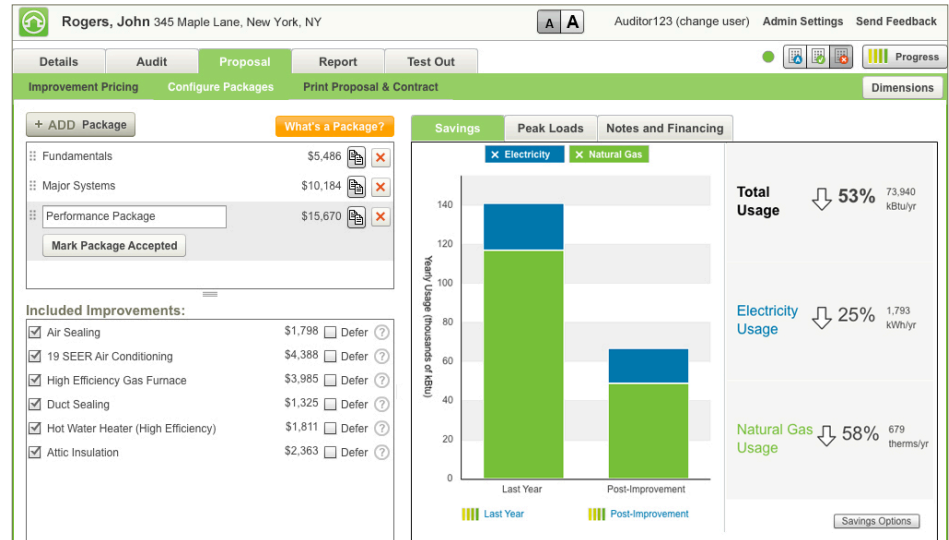

Accurate Savings Predictions

- Select potential energy upgrades on the fly, as you enter audit data.

- Interactive savings explorer tool to compare multiple solution packages and model several scenarios on-the-spot, so energy and dollar savings are optimized.

- True-up dashboard to compare modeled data to utility bills, supplying real-time feedback about the house.

Polished Reports & Proposals

- Custom reporting engine with easy integration of photos, and pre-defined templates and content to generate high-quality, personalized reports on the spot.

- Built-in estimating tool to produce a detailed proposal designed to fit the homeowner's energy needs and budget. Gives your sales team a clear advantage to turn more audits into retrofits.

RE-INVIGORATE YOUR PROGRAM

» Faster Audits

» Comprehensive Energy Upgrades

» Higher Close Rates

» Happier Homeowners

» More Predictable Savings

» Fewer Errors

Make your program stand out with really successful contractors. With six years of on-the-ground experience, Recurve empowers local and national energy efficiency programs. We have leveraged our intimate knowledge of the most pressing problems that contractors face to develop software that helps you attract and retain first-rate contractors and reduce quality control concerns while achieving energy reduction goals.

- Reduced risk through accurate, BESTEST-approved savings predictions and hourly simulation, leading to a smoother EM&V process and happier homeowners

- Engaging homeowner reports and proposals for your contractors, helping them convert more assessments to upgrades and helping you reach your program energy reduction goals while lowering your marketing dollar spend through improved close rates

- Seamless integration with your administration data base through an XML export, ensuring fewer errors, better data, and simplified quality control

- DOE reporting for Better Buildings Grantees

- RESNET Accredited Software for Tax Credit Compliance

- Special EE program pricing is available
