

THIS IS A WARNING!

As a result of the irresponsible policies and the abuse of power by the Ashland Ranger District, we the citizens of the Klamath - Siskiyou Bio-Region hereby revoke your mandate.

We find the proposed "Hazred" timber sale to be unacceptable and lacking scientific basis. The "Hazred" timber sale is nothing more than a thinly veiled conspiracy to plunder the Ashland watershed for it's "valuable timber resources". For the last time, we have been betrayed by so-called public servants who put corporate interests above the life support systems of the earth.

Linda Duffy, we realize that you are in a difficult situation regarding the decision that you have to make on the "Hazred Project". However, this is nothing compared to the difficulties you will face should you choose to go ahead with this timber sale.

The assault on this watershed by the Ashland Ranger District is a war on the last tracts of wild lands in our region. This atrocity will be met with uncompromising resistance. Campaigns such as Hoxie - Griffin, Warner Creek, and China Left will seem minor in comparison to the wave of opposition that you will meet if one tree falls.

Diplomatic channels have been exhausted. Consider yourself warned...
